900 MHz ISM INTEGRATED CONNECTOR ANTENNAS MN SERIES

CARE AND MAINTENANCE

In order to maximize both the performance and the appearance of your antenna, it is recommended that you treat it in the same manner you do your car. Periodic cleaning and a quality car wax may be used to help protect the finish and extend the life of the antenna.

TUNING

The MN series antennas are factory tuned; no trimming of the rod is necessary.

MOUNTING HINTS

1. For maximum range, always mount your base station as high and clear of surrounding objects as possible.
2. **Use extreme caution when working near telephone and electrical power lines. Always mount antennas at least twice the length of the antenna away from power lines.**
3. Always insulate your connectors with tape, silicone or other weather proof materials for long life and trouble free performance.
4. When side mounting to a tower, make sure that your antenna is at least 24" from tower legs or other antennas.

CAUTION AND WARNING

YOU COULD BE KILLED IF THIS ANTENNA COMES IN CONTACT WITH ELECTRIC POWER LINES OR IS BROUGHT IN PROXIMITY WITH A HIGH VOLTAGE ELECTRIC FIELD. FOR YOUR OWN SAFETY, USE EXTREME CAUTION WHEN INSTALLING THIS ANTENNA. KEEP AWAY FROM POWER LINES.
