

Installing the Memory Module

- Step 1** Turn off the system.
Step 2 Unplug the power-cord.
Step 3 Loosen 8 screws on the top cover, and remove it from the chassis.

- Step 4** Please follow these steps to install the Memory Module:
- (1) Push down latches on each side of the 204-pin DDR3L SO-DIMM socket.
 - (2) Align the memory module with the socket that notches of memory module must match the socket keys for a correct installation.
 - (3) Install the memory module into the socket and push it firmly down until it is fully seated. The socket latches are levered upwards and clipped on to the edges of the DDR3L SO-DIMM.

- Step 5** Close the cover to the chassis, and fasten all screws.

eBOX638-840-FL Quick Installation Guide
