

A55136TB, TBS

PRODUCT OVERVIEW

Mobile Mark's A55136TB is a premium heavy-duty P25/TETRA triband mobile antenna. It has an omni-directional pattern and it is vertically polarized for 50 Ohms impedance match.

This high quality, high performing antenna is specifically designed for public safety P25/TETRA triband mobile radios.

This antenna is manufactured using the finest corrosion resistant materials and finishes available. The enclosed silver plated phasing coil insures dependable operation.

The ABS base has an ultrasonically welded brass insert and a spring loaded contact for long term reliability.

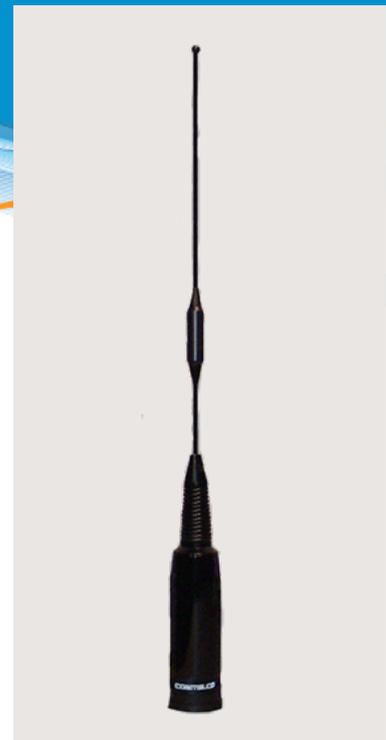

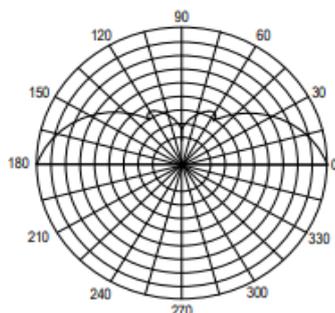

This antenna mates with a standard NMO type mount, providing an excellent moisture seal even when the antenna is removed.

Specify A55136TB for option with Bullet. Specify A55136TBS for option with Shock Spring.
