

Magnetic Mount

Data Sheet

Parsec's magnetic antenna mounts allow for temporary network installations, with no drilling required. Simply screw the antenna into the magnetic mount and set on the roof of your vehicle for high speed performance.

Temporary Network Solution

The design of our magnetic mount allows for an installation that has no impact on the vehicle. The hole in the center lets you screw in any mobile antenna with ease.

Strong Connections

While the Magnetic Mount allows for strong network connections on the go, the 4 magnets also provide a strong physical connection to the roof with 40lbs of pull strength.

Compatible Antennas

- 1.5 inch Hole Diameter (PTA0329)

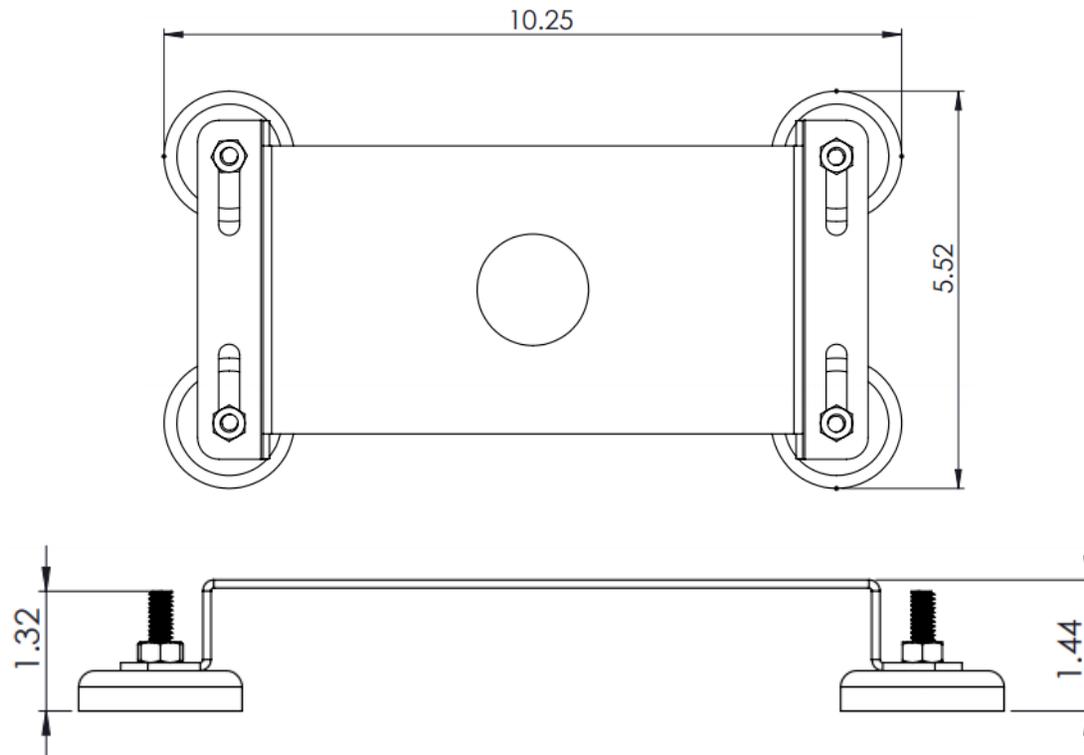

This mount is meant for our larger antennas, including K9 and Belgian Shepherd.

- 1 inch Hole Diameter (PTA0330)

This smaller hole diameter supports our smaller antennas such as the Rottweiler and Doberman.

Specifications

Ordering

PTA0329- Magnetic Mount - large hole (PROBS, PROK9) - hole dia 1.5"

PTA0330- Magnetic Mount - small hole (PROD, PROR) - hole dia 1.0"
