

DON'T TRAVEL WITHOUT A HIGH SPEED NETWORK

Marine Grade Antennas

Our rugged Doberman and Husky series antennas are designed to optimize performance while offshore. These Ocean Approved antennas were made with powdercoated metal for corrosion resistance.

Husky

Ocean Proof Design

The high end stainless steel base plate of our marine grade antennas prevent any corrosion or rust that would occur on competing antennas. The hard rugged shell keeps any unwanted splashes from affecting the antenna elements. Parsec's ocean approved antennas are rugged IP67 rated antennas that won't mind the waves!

High Speed for the High Seas

What could be better than traveling in style? Traveling in style with high speed internet! Don't settle for weak signal, or poor connections. Parsec's antennas deliver you the best performance on the market. When you're sailing away from shore, you can be sure Parsec has you connected.
