

# BEST RUGGED PUBLIC SAFETY ANTENNA!

## Belgian Shepherd

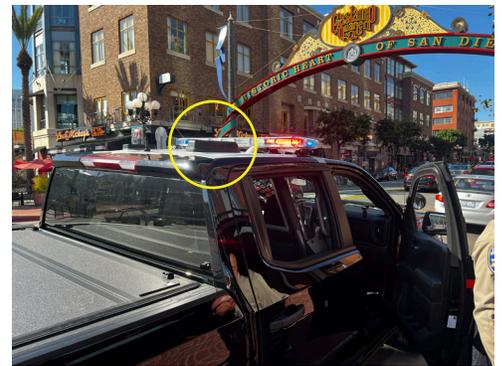

Trusted by the nation's most widely respected public safety departments, our Belgian Shepherd PRO Series antennas bring durability and distance to your fleet network. When disaster strikes and cell towers are compromised, distance is the difference between critical communications and safety. Each antenna element is secured by two epoxy tip screws for a rugged build to withstand the harsh elements and power wash detailing in an IP67 rated housing.

## Rugged Design

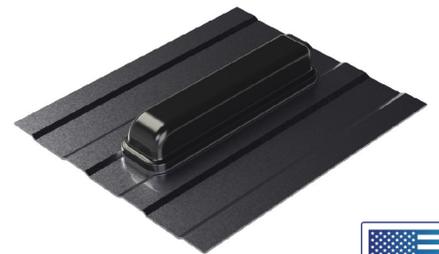

The high end rugged radome of the Belgian Shepherd antenna keeps any unwanted water, oil, or other contaminants from affecting the antenna elements. Designed with an aerodynamic curved top and powerful gasket to withstand highway speeds and inclement weather. Parsec's external antennas are rugged antennas that won't buckle under the pressure!

## Leader in Public Sector

The Belgian Shepherd is a 4x4 MIMO cellular, omni-directional antenna that supports 5G frequencies with its high efficiency and high gain. This antenna can also include Wi-Fi and GPS, perfect for mobile applications. Why settle for less for your cellular solution? Find out why the Belgian Shepherd is loved and trusted by law enforcement and emergency services for its high performance.

# 5G HIGH PERFORMANCE 3 DAY TURN AROUND RUGGEDIZED BUILD

- **Over 100 High Strength Solder Joints**
- **Triple Hull Design**
- **Compression Gasket**
- **Cables with 80 lb. Pull Strength**
- **Power Wash Safe**

## BUILT FOR RUGGED USE

- **Full shaft sealed with Loctite Hysol**
- **Extreme temperature rated**
- **UL 94V-0 flammability rating**
- **85 A hardness rating**
- **363 psi tensile strength**
